Industry Safety Expert, Richard Heath from the Cast Metal Federation**

Other topics include:

- How to Implement an Effective Respiratory Protection Programme
- The 3M 4 Step Guide to Hearing Conservation
- Practical Management of Hand-Arm Vibration

Including interactive workshops

Magna Centre, Sheffield.

In the mid-twentieth century, Magna's site was one of the biggest steelworks in the world. With elements of the original building largely preserved, impressive industrial pieces such as hulking hooks, cupolas and cranes are still there to be seen. The Magna Centre is home to the Magna project, an educational project dedicated to steelmaking and its uses. Just a few minutes from junctions 33/34 of the M1 and Sheffield's Meadowhall Shopping Centre, Magna is conveniently located with ample free parking.
